With so much concern over skin cancer these days, visitors will certainly appreciate a place to sit where their skin is shaded from the harmful UV rays of the sun. This fabric bench attachment is made from arched polyethylene to affix to a wide variety of Webcoat brand bench models. Webcoat makes these attractive shades in beige, yellow, blue or green, and they are designed to provide maximum protection and comfort to whomever is sitting beneath them. Ideally, the bench frame will have a diameter of 2-3/8 inches to ensure proper set up. These shades weigh 130 pounds so they are not recommended for portable benches that are not capable of offering a secure frame. Fits specific models of Webcoat benches only. Please contact a sales representative to see if the shade works for your bench!
